

Dietary Network Structures: Gaussian Graphical Model Analysis

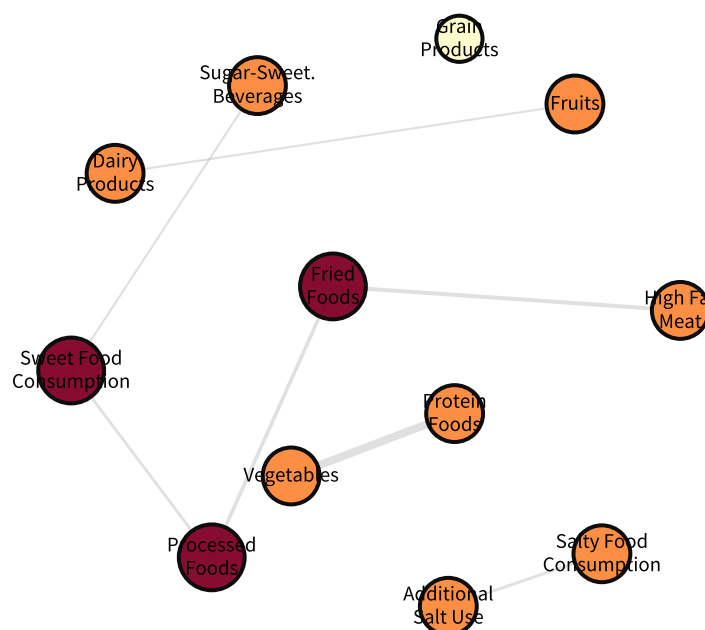

Male Young MetS(+)
(N=516, Edges=8, Density=12.1%)

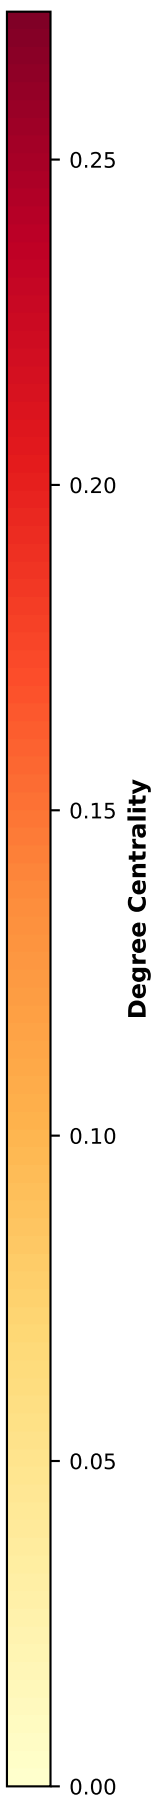

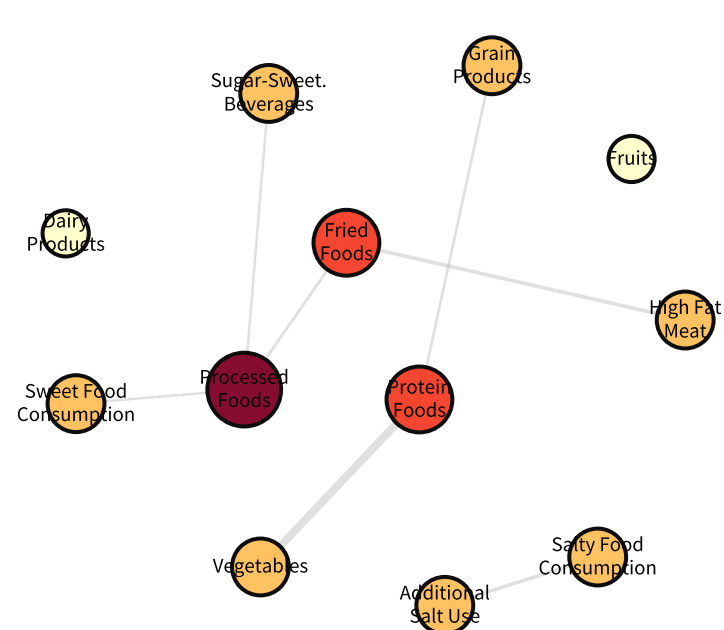

Male Older MetS(-)
(N=4737, Edges=7, Density=10.6%)

Female Middle MetS(+)
(N=758, Edges=7, Density=10.6%)

Female Middle MetS(-)
(N=5629, Edges=7, Density=10.6%)

Note: Node size and color intensity represent degree centrality (number of connections). Edge thickness represents partial correlation strength.
